

HARSH SINGH

ABOUT ME

AI Developer & Automation Engineer with a focus on Agentic Workflows and LLM Integration. Expert at architecting autonomous systems using n8n, Python, and OpenAI/Gemini APIs. Skilled in building end-to-end RAG pipelines, prompt engineering, and automating complex business logic. Proven track record in transforming unstructured data into intelligent, actionable outputs through scalable AI deployments and API-first architectures.

EDUCATION

Bachelors of Technology in
Computer Science
Engineering | Chandigarh
Engineering College,
Landran

Session: 2022–2026 | Score: 8.39
CGPA

Intermediate (CBSE) | Radhika Bal
Vidya Mandir

Session: 2019–2020 | Percentage:
71.4%

Matriculation (CBSE) | Radhika Bal
Vidya Mandir

Session: 2017–2018 | Percentage:
67%

EXPERIENCE

● Data Analyst (Freelance)

2025

Jan 2025 – Present

- Analyzed and cleaned 50,000+ records using Excel, SQL, and Python, improving data accuracy and reporting reliability.
- Built automated ETL workflows using Power Query, reducing manual reporting effort by 30%.
- Wrote optimized SQL queries using JOINS, GROUP BY, and subqueries to extract and aggregate business data.
- Developed Excel dashboards to track KPIs and support management decisions.

SKILLS

- Data Analysis: Data Cleaning, EDA, Data Validation
- Programming: Python (Pandas, NumPy, Matplotlib)
- Databases & SQL: MySQL, MongoDB,
- BI & Visualization: Excel Dashboards, Power BI, Pivot Tables, Power Query
- ETL & Automation: Data Transformation, Automated Reporting
- Operating Systems: Windows
- Tools & Concepts: n8n, OpenAI / Gemini API,
- Dashboard Automation | Data-Driven Decision Making

PROJECTS

AI-Driven LinkedIn Job Search & Resume Matching Automation

- Developed an automated n8n workflow to trigger daily job searches based on user-defined filters and keywords.
- Integrated Google Drive and OCR tools to extract and process resume data for real-time profile analysis.
- Utilized AI agents to score job descriptions against candidate skills, generating personalized match ratings.
- Automated data logging to Google Sheets and configured discord notifications for high-scoring job opportunities.
